# This drawing has errors

Metric version

Imperial version

Drawn by Rob Gray, based on measurements by Mowcius and cjands40 and observations by Rob Gray.

NOTE: Not guaranteed to be correct until verified by building a PCB and physically checking against existing shields and Duemilanoves. Metric version based on measurements of an actual board, imperial version based in information from the Arduino site, measurements from an existing Eagle layout, and some conjecture.

Direct any questions to rob@robgray.com
